## Prepublication Announcement

# CUMULATIVE INDEXES TO *PSYCHOLOGICAL ABSTRACTS*, 1972-74

The Cumulative Indexes for 1972-74 may be ordered now at prepublication prices. The size of these 3-year indexes is compatible with those published previously. Pages are 10" by 14", printed on durable acid-free paper, encased in Class A library binding. Two kinds of indexes are available: Subject and Author.

**SUBJECT INDEX** consolidates references to the world's literature in psychology and related disciplines that were summarized in 36 monthly issues of *Psychological Abstracts (PA)*. Index terms representing the major concepts described in this literature have been applied based on the new *Thesaurus of Psychological Index Terms*. A descriptive phrase is included under each index term, enabling the researcher to select from all material related to a single concept those references dealing with other concepts. Entries in the Index contain subject terms, *see* and *see also* reference listings, subject index phrases, and *PA* volume and record number.

**AUTHOR INDEX** contains references to authors who produced material that were summarized in 36 issues of *Psychological Abstracts (PA)*. As many as four authors are referenced for each entry. Thus, all the publications of individual investigators who conduct programmatic research in collaboration with others can be easily identified. Primary entries in the Index contain up to four author's names, title of article, and indication if the title has been translated from a foreign language, title of source document, year of publication, volume and issue numbers, inclusive pagination, and *PA* volume and record numbers. Secondary authors are listed by name only, with a cross-reference to the primary author and *PA* volume and record number.
